# VSM<sup>®</sup> TDW<sup>®</sup> LARGE VACU-STACK<sup>®</sup> CHIMNEY CAPS

This is the premier chimney cap for solving common, wind-related draft problems. Wind problems often occur for homes that have hills, mountains, tall trees or taller buildings in the vicinity.

This cap also functions as a conventional chimney cap by protecting the chimney from rain, snow, debris, and animals. Designed specifically for oceanic environments, designed to protect against rust and erosion that other caps crumble to. It is made of Austenitic Stainless Steel T316 and is designed to fit round chimney liner and Class A solid pack chimneys.

This Model works with the following types of chimneys:  
Class A Air-Cooled Chimney
